ETDE 3213 | Final Project Presentation - Group Rubric

OSUIT - Project Management & Engineering Economics

Team: _____ Project: _____ Date: _____

Group evaluation category	Maximum	Score earned
Project Overview & Objectives	8	
Project Planning & WBS	12	
Schedule & Gantt Chart	8	
Budget & Bill of Materials	12	
Technical Design & Execution	12	
Challenges & Problem-Solving	8	
Final Results & Demonstration	10	
Lessons Learned	5	
Presentation Quality	5	
GROUP TOTAL	**80**	

Group feedback:

_____

_____

All team members share this group score (maximum 80 points). Each student also receives an individual score (maximum 20 points).

Part 1 | Group Presentation Scoring Guide

Use the 1–5 performance descriptions below for each group category. Convert the rating to the category's maximum points using the conversion table at the bottom.

Category	1 — Poor	2 — Limited	3 — Satisfactory	4 — Strong	5 — Excellent
Project Overview & Objectives	Purpose unclear; no goals	Basic purpose; goals missing	Purpose and most goals stated	Clear purpose and measurable goals	Compelling problem, goals and success measures
Project Planning & WBS	No usable WBS	Incomplete tasks or ownership	Main tasks and roles shown	Well-organized tasks and milestones	Complete WBS with owners, dependencies and tracking
Schedule & Gantt Chart	No credible schedule	Major dates or tasks missing	Timeline and key milestones shown	Planned vs. actual progress explained	Detailed schedule, variances and corrective actions
Budget & Bill of Materials	No usable BOM or costs	Major items or costs missing	Most items and estimated costs shown	Itemized BOM and actual costs compared	Complete BOM, cost variance and purchasing rationale
Technical Design & Execution	Cannot explain design	Limited design or work evidence	Basic design and work described	Sound design with build/test evidence	Strong technical decisions supported by testing
Challenges & Problem-Solving	No challenges addressed	Problems named, no solutions	Problems and basic fixes explained	Solutions and impact explained	Root causes, tradeoffs and lessons demonstrated
Final Results & Demonstration	No results or evidence	Limited or unclear evidence	Partial demo or credible results	Working demo with testing evidence	Thorough demo, verification and limitations
Lessons Learned	No meaningful reflection	Vague or generic reflection	Some specific lessons identified	Clear successes, failures and improvements	Insightful reflection tied to future practice
Presentation Quality	Disorganized; difficult to follow	Weak visuals or delivery	Understandable with some gaps	Organized, clear, professional	Polished, engaging, readable and well paced

Rating-to-points conversion (round to nearest whole point):

Maximum	1 — Poor	2 — Limited	3 — Satisfactory	4 — Strong	5 — Excellent
5 pts	1	2	3	4	5
8 pts	2	3	5	6	8
10 pts	2	4	6	8	10
12 pts	2	5	7	10	12

0 points = no evidence or no submission for that category. Group maximum = 80 points. The individual scoring guide remains on the final page.

Part 2 | Individual Student Evaluation - 20 Points

Team: _____ Group score: _____ / 80 Date: _____

Enter each student's name and award 0-5 points for each of the four categories. Use the scoring guide below.

Student name	**1. Contribution** / 5	**2. Project Knowledge** / 5	**3. Presentation** / 5	**4. Accountability & Teamwork** / 5	**Individual** / 20	**Final** / 100

SCORING GUIDE - apply these descriptions to each category

Category	**1 point - Poor**	**2 points - Limited**	**3 points - Satisfactory**	**4 points - Strong**	**5 points - Excellent**
1. Contribution	Little/no assigned work completed	Major tasks incomplete; needed frequent prompting	Completed some assigned work	Completed most assigned work reliably	Completed all assigned work; meaningful initiative
2. Project Knowledge	Cannot explain own work	Limited understanding; major errors	Explains basic role with some gaps	Explains own work and key project decisions	Clearly explains own work and broader project
3. Presentation	Does not meaningfully present	Minimal or unclear explanation	Adequate explanation with support	Clear, organized explanation	Confident, precise, professional explanation
4. Accountability & Teamwork	Unreliable; little collaboration	Frequent missed commitments	Inconsistent follow-through	Dependable and cooperative	Consistently dependable; proactively supports team

0 points: No evidence of participation or performance in that category. **Final score:** group score (out of 80) + individual score (out of 20).

Part 3 | Bachelor of Technology Instrumentation — ABET Assessment

Instructor use only. Keep the 80-point group and 20-point individual course grade unchanged. This sheet captures separate evidence of bachelor-level student outcome attainment.

Proposed ETAC bachelor-level outcome alignment (verify against the program's approved SOs and performance indicators)

Assessment area	Evidence from existing rubric	Individual assessment method
Technical problem-solving	Technical Design & Execution; Challenges; Final Results	Ask each student to explain a technical choice, test result or corrective action.
Communication	Presentation Quality; individual Presentation; Project Knowledge	Evaluate the student's own spoken technical explanation and answers.
Teamwork	Individual Contribution; Accountability & Teamwork	Use individual rubric scores plus documented assigned tasks or peer evidence.
Project management / economics	WBS; Gantt; BOM and budget	Use as course-level evidence; map to a program SO only if approved.

Individual ABET evidence log — one line per student

Student name	Technical (1–5)	Communication (1–5)	Teamwork (1–5)	Evidence / improvement note

Suggested rating scale: 1 = insufficient evidence; 2 = limited; 3 = meets expectations; 4 = strong; 5 = exemplary. 0 = no evidence. Suggested attainment threshold: 3/5 or higher for each assessed indicator; confirm with the program's approved assessment plan.

Assessment control: These are proposed outcome areas, not verified OSUIT SO numbers. Match them to the bachelor program's approved ETAC outcome statements, performance indicators, and attainment thresholds before reporting to ABET.
